DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including: A method of cutting a resin matrix portion on a surface of a composite molded article that includes an irregular surface having a height from a foundation layer surface within a range of 1 to 100mm using a high pressure water jet surface cutting device, the resin matrix portion having inorganic particles and a resin, said method comprising: moving a high pressure water jet nozzle head in X and Y directions while rotating about an axis of rotation; and directing high pressure water jet centers of a plurality of high pressure water jet nozzles arranged on the nozzle head at inclined angles with respect to the axis of rotation so that the high pressure water jet centers of the nozzles are directed at the inclined angles with respect to the foundation layer surface of the composite molded article while cutting the resin matrix portion; wherein the plurality of high pressure water jet nozzles are positioned on the nozzle head with the high pressure water jet centers of the nozzles being directed at the inclined angles so that said cutting of the resin matrix portion by jetting high pressure water from the nozzles during said moving the high pressure water jet nozzle head in the X and Y directions and rotating the high pressure water jet nozzle head about the axis of rotation results in areas, formed by loci of the jet centers with respect to the foundation layer surface against which the high pressure water is jetted and strikes, being uniform.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
